DETAILED ACTION

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Frederick Samuels on December 9, 2003.

The application has been amended as follows: In claim 2, after "The system of claim", delete "1" and insert "6". In claim 6, third paragraph, after "aperture-ingress-side surfaces" and before "is either allowed", insert ", and not absorbed by the aperture-ingress-side-surface,".

Allowable Subject Matter

The following is an examiner's statement of reasons for allowance: The prior art taken either singularly or in combination fails to anticipate or fairly suggest the limitations of the independent claims, in such a manner that a rejection under 35 U.S.C. 102 or 103 would be proper. The prior art fails to teach a system having one or multiple curved ingress side surfaces treated to absorb light and positioned such that unabsorbed light is either redirected away from the input light train or reflected to enter the aperture ingress as claimed in independent claim 6, a low backscatter device such that an input light is redirected in a direction other than towards the light source and including at least one surface treated to absorb incident light as claimed in

independent claim 13 and a system such that an input light is either redirected in a direction other than towards the light source or allowed to enter the aperture as claimed in independent claim 22.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
